

Powerful Geography Implementation Process

What is Powerful Geography?

Powerful Geography is a teaching process that seeks to better align students' aspirations with the geographic capabilities they need to get jobs and participate in civic life. This worksheet shows teachers the process of how to generate powerful geographic knowledge and create a lesson plan based upon students' aspirations.

| What geography subject matter am I required to teach or develop? (TEKS) | How does that subject matter relate to my students' aspirations for their careers and civic life? | How can it be transferable to jobs and careers in my area (i.e. city, state)? | How can it be incorporated into an existing lesson or future curriculum product? |
|---|---|---|--|
