Vocabulary Application
Geographic Vocabulary Worksheet

Physical Geography
- Physical Features
- Physical Processes
- Physical Landscape
- Topography
- Climate
- Weather
- Biome
- Natural hazards and disasters (earthquakes, hurricanes, tornadoes, tsunamis, etc.)
- Natural resources – renewable and non-renewable
- Plate tectonics
- Soil building
- Erosion
- Weathering
- Ecosystems
- Temperature
- Precipitation
- Consequences
- Disasters
- Vegetation

Human Geography
- Culture
  - Characteristics
  - Institutions
  - Traits
  - Diffusion
  - Urbanization
- Modes of transportation
- Settlement
- Population Growth
- Population Trends
- Demographics
- Distribution
- Dense/sparse
- Art, architecture, music, literature
- Infrastructure
- Globalization
- Standards of living
- Pandemics and epidemics
- Economic activities
- Development levels
- Trade
- Power

Places and Regions
- Region - functional, perceptual
- Place
- Exchange
- Push/pull factors
- Routes/flows
- Distribution
- Interdependence
- Networks
- Sovereign
- Compare
- Distinctive
- Movement of people - migration, travel
- Culture of regions and places
- Infrastructure and connectivity
- Diffusion between places and regions
- Trade networks and trade agreements
- How physical geography (climate, features, etc.) create a distinct place
- Globalization

Skills, Technology, and Perspectives
- Geospatial technology – Geographic Information Systems (GIS), Global Positioning System (GPS), Remote Sensing, LIDAR
- Cartography and Photogrammetry
- Field Methods
- Quantitative Methods
- Qualitative Methods
- Spatial Thinking
- Global Perspective
- Interdisciplinary Perspective
- Historical Perspective

Environment and Society
- Environment
  - Modify and Adapting the Environment
  - Innovation
  - Technology
  - Management
  - Resource management
  - Products
  - Agriculture
- Energy (wind, solar, oil, gas, nuclear, etc.)
- Evaluate
- Policy
- Environmental policies
- Preservation
- Growth/Development
- Diverse use
- Benefits/challenges
